

Empowering Equity Academy

*Women in STEM
and Equity*

Luxembourg, September 2026

Why the Empowering Equity Academy?

We want to improve the European Investment landscape and offer real, tangible opportunities to women in STEM & Sustainability areas

The current European venture capital and private equity space is suffering from certain market gaps

Skills are missing

Specifically in the Science, Technology, Engineering and Mathematics areas – as well as Sustainability – we are missing mindsets and skillsets that can really drive the investment space

Diversity is limited

Women are underrepresented in EU private equity, venture capital and private debt markets. It's time to change that.

Empowering
Equity Academy
2026 edition

We want to empower women studying STEMs & sustainability subjects to consider entering the equity investment markets. We do this by offering:

- 1 Real world learning**
We offer a free and specialised course in how Europe's private equity markets work
- 2 Networking & career opportunities**
We provide a platform for career networking with some of the best fund managers in Europe

What does the Empowering Equity Academy offer me?

Up to 40 spots are available for those studying STEMs and sustainability-related subjects

Learn Online

Attend a fully-fledged training programme, laying the ground on the activities of the EIB Group, principles of finance and covering investment in venture capital and private equity and specific strategies like impact investing.

Meet a wide range of investment professionals from the EIF and deep dive into the investment world.

All lessons will take place online.

“I encourage you to sign up to this opportunity, the equity investment space is where we can truly turn innovation into tangible results for society at large”

Silvia Manca, Head of Competitiveness, Cohesion & Social Impact

Engage Onsite

Participate in the EIF’s flagship Empowering Equity event. Attended each year by high level market players, will get the chance to attend coaching sessions, workshops and focus on concrete case studies.

In addition, you will benefit from direct mentorship and be able to network and meet with industry professionals who might be actively recruiting.

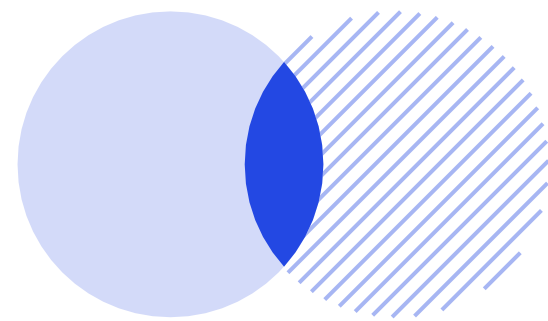

“Join our programme to connect with like-minded peers, explore new career horizons and apply technical skills towards innovative sustainable solutions. Become part of a vibrant, supportive community!”

Anna Canato, Head of Youth Engagement and Society Division, EIBI

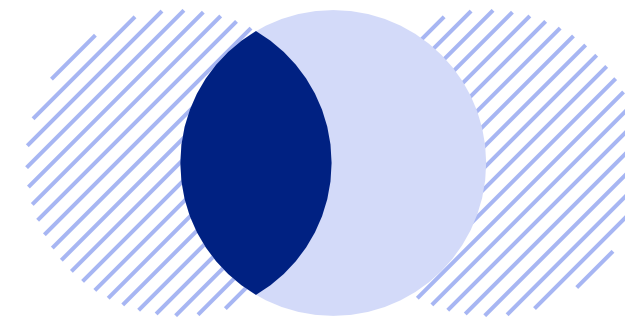

Indicative syllabus (for online learning)

Exact course structure may be subject to adjustments

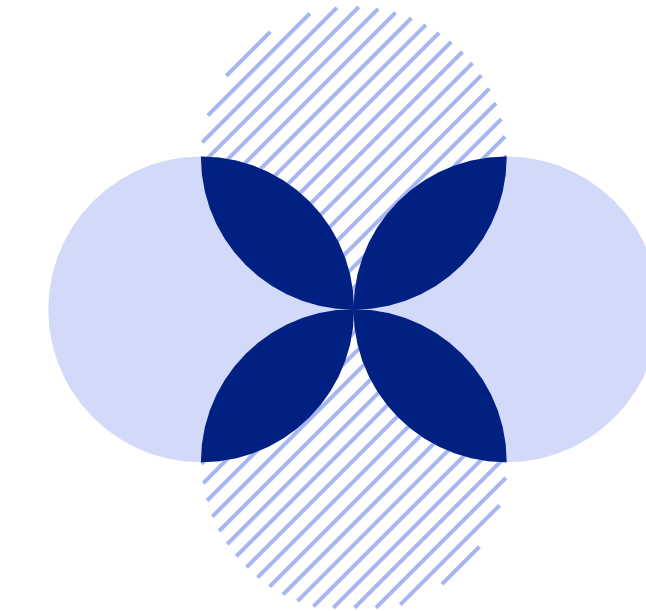

Introduction to equity markets

- The difference between Venture Capital (VC) and Private Equity (PE)
